INTERNATIONALLY RENOWNED UNIVERSITY MEDICAL TEAMS

Our medical teams contribute to the latest scientific advances and welcome each year doctors, interns, researchers and students who come from all around the world to learn about French medical know-how in the best training and research programs.

Our expertise covers numerous highly technical and surgical specialties, such as thoracic surgery, neurosurgery and 3D navigation in orthopedic surgery. Our hospitals are major centers of technological innovation and development that provide the finest up-to-date care in diagnosis and therapeutics.

THE BEST OF TECHNOLOGY, A CULTURE OF INNOVATION

We rely on a constantly evolving technical platform: 1.5T MRI, 3T MRI, ultrasound scans, the latest helical scanners, senology units, conventional and vascular radiology rooms, state-of-the-art surgical equipment: neuronavigation robots, Da Vinci® robot, Rosa® robot, lasers... Future innovation also includes gene therapy and customized medicine, fields in which the medical teams at Paris Hospital Foundations are active.

THE VALUES OF FRENCH MEDICINE: AT THE HEART OF OUR COMMITMENT

Renowned for its commitment to integrity and probity, French medicine meets high quality and safety standards in order to guarantee the best possible care.

Open to the world, we give you access to the best skills, make the most out of the best technological and therapeutic evolutions and remain at the forefront of innovation.

INHERENTLY ETHICAL

Care at Paris Hospital Foundations is open to all, in line with French ethical values.

All decisions regarding patients are made in compliance with the principles of integrity, transparency and ethics, based on the patient's own choices. Transparent staff management and skills recognition for each team member contribute to a trusting environment that benefits all parties.

CERTIFIED QUALITY AND SAFETY MEETING THE HIGHEST STANDARDS

French medicine is renowned for its quality control system. At Paris Hospital Foundations, our quality requirements for admission, care, safety and dialogue with patients are recognized every year by our first places in French hospital rankings. Our excellent results in certification procedures conducted by the French National Health Authority are based on highly demanding criteria regarding infection risks, patient identification, pain management, medical care and safety of care.

A SERVICE-MINDED DEDICATED CONTACT

Open to patients from all around the world, we offer customized services, easily accessible through a dedicated contact. A single interlocutor follows each patient and his or her accompanying persons and aims to ease the conditions of hospitalization in Paris. Throughout the care process, patients can choose the solutions that provide the most peace of mind, either for themselves or with respect to their insurance coverage, from administrative assistance to their stay in Paris.

CUSTOMIZED CARE FOR PATIENTS AND ACCOMPANYING PERSONS

BEFORE

- Assessing the medical record and proposing a treatment protocol
- Estimating medical costs
- Booking plane or train tickets
- Booking a hotel room or renting an apartment
- Managing all administrative and financial details for the stay, both at the hospital and in Paris.
- Scheduling consultations and/or care at the hosting hospital
- Managing all administrative formalities for entry into France (visa, travel/repatriation insurance, no-debt certificate...)

DURING

- Meeting at the airport or at the train station, and transfers
- Customized support during the entire care process
- Interpretation services
- Special menus available
- Care of relatives: tourist information, bookings, leisure
- Updating medical cost estimate
- Management of administrative and financial formalities
- Support and assistance for families

AFTER

- Organizing the return trip
- Preparing the release of medical records (medical reports, prescriptions)
- Organizing the rehabilitation or convalescence process
- Helping with administrative and financial formalities
- Following up on the patient's condition, in coordination with the family or the attending physician

A MINIMA REDUCED WAITING TIMES, QUICK CARE AND VERY COMPETITIVE PRICING

Leading the Commonwealth Fund global rankings for quality and rapidity of its organization, the French health system guarantees the best standards of care in all medical disciplines. In line with this standard of excellence, Paris Hospital Foundations ensure that patients will receive care quickly. Following the French health policy, and consistent with our hospital-foundation status, we offer very competitive pricing: two to five times lower than in the United States, and ten to fifty percent lower compared to Asia or Mexico.

FOCH HOSPITAL
ROTHSCHILD FOUNDATION HOSPITAL
DIACONESSES CROIX SAINT-SIMON
HOSPITAL GROUP

MEMBERS OF
**PARIS HOSPITAL
FOUNDATIONS**

Foch Hospital was born out of a generous idea embodied by the Foundation “franco-américaine du Mont-Valérien”, also known as the Foundation “Maréchal Foch”, recognized as being of public utility as of its establishment in 1929. As a private health institution in the public interest, covering essential adult medical and surgical disciplines, Foch Hospital officially serves as a reference for other hospitals, particularly for its clusters dealing with neuroscience, respiratory tracts, urology and nephrology, and obstetrics and gynecology. Multidisciplinarity and the high level of medical care at Foch Hospital are supported by an especially strong technical platform. Foch Hospital is the largest private university hospital in France.

40 rue Worth – 92150 Suresnes

Founded in 1905 in the heart of Paris, **Rothschild Foundation Hospital** is recognized as being of public utility. It treats all head and neck diseases, from screening to surgery for the most complex cases – for adults and children, urgent or scheduled. With state-of-the-art techniques as well as medical and surgical teams, the Foundation is ranked top among French hospitals every year for its disciplines, including ophthalmology, neurology, neurosurgery, interventional neuroradiology and ENT. As a university hospital, the Foundation plays a key role in medical research; each year, it attracts numerous students from the best universities and participates in many cooperation and international exchange programs. The recognized quality of its care, its cutting-edge techniques and the excellence of its teams attract patients from France and 45 foreign countries.

25 rue Manin – 75019 Paris

Diaconesses Croix Saint-Simon Hospital Group

is a non-profit private hospital, created on the initiative of the “Fondation des Diaconesses de Reuilly (Versailles)” and the “Fondation Œuvre de la Croix Saint-Simon (Paris)”. The establishment regularly leads French media rankings for its various medical and surgical specialties: joint replacement surgery, gastroenterological surgery, urology, gynecology, gastroenterology, interventional proctology, internal medicine, medical oncology, rheumatology, maternity (type 1), medically assisted reproduction. It is a national reference hospital for treatment of bone and joint infections as well as Fabry disease. It is equipped with the highest diagnosis and care technology such as a surgical robot and a 3D tomosynthesis system. The establishment is a key player in clinical research, not only recognized for the high quality of its treatments and technical expertise, but also for the overall level of care it provides to patients. It is composed of two sites in Paris: Croix Saint-Simon Hospital and Diaconesses Hospital (maternity and palliative care).
